

# *Meet our Volunteer Advisor:*

## **Jennifer Senchak, ISA Certified Arborist**

I work with Gargiulo Landscape, a hardscaping company based in sunny Prospect, PA. One of our specialties is historic renovations and we often work on Butler's beautiful cobble and brick streets. I grew up on the border of McConnell's Mill State Park, which continues to be threatened by surrounding strip mines.

My background lies in conservation of natural resources and ecological responsibility in long term property management. I maintain licensing with the PA Department of Agriculture for restricted use treatment of Shade and Ornamental trees. I am a 4-H "er" for life and serve on the Advisory Board for the Horticulture Technology program at Bidwell Training Center in Pittsburgh. Through these avenues, I have had the opportunity to work with Pittsburgh's Shade Tree Commission and their mission supporters such as TreeVitalize and TreePittsburgh (The former, a state-run program, the latter a not for profit).

I am happy to assist Butler's Shade Tree Commission with their goals of educating and supporting our community with information and caring for our Shade Tree resources.
